TO WHOMSOEVER IT MAY CONCERN

With immense pleasure, I appreciate Dr.Viswabhaskaran for his dedicated efforts to bring product like High Temperature Furnace, which play a vital role in the research activities of Ceramic Pigment Technology. Our Scientists and scholars are so comfortable with the furnaces and the results obtained are encouraging and reliable.

The stability of the furnace is so constant for sintering and calcining various types of materials like Ceramic composite. The temperature is very accurate even at high temperatures of about 1700°C with $\pm 1^\circ\text{C}$ accuracy. It is so safe and easy to handle at various circumstances. Dr.Viswabhaskaran and team are able to provide valuable service to maintain the facilities. They are also capable to make any custom-built products with state-of-the art technology and much sophisticated.

I wish Dr.Viswabhaskaran, with his expertise and dedication, to grow greater heights.

(M.Selvaraj)
